Testimonials

Kind messages to: SORINTians

"Globally known banking and finance entity

Sorint is great in everything they offer. You will enjoy working with them. This is a result of a good working environment."

"An attendee

I learned a lot. The projects we worked on boosted my knowledge. It exactly what I needed to start using Carbon Black for our own environment. It was not possible online. The documentation of the platform was just not enough. I had a good theoretical understanding but not enough experience to manage everything. Now I feel like an expert."
Open-source is a great opportunity to solve the gap between the legacy and digital world because it has itself the answer to simplify the complexity, and this is the service we want to provide to our clients.
