Open-source Software

Technology Consulting Service

- Where Sorintians ardently embrace innovation, unlock boundless openness, foster creativity and unveil new horizons.

- Unlike proprietary software, open-source projects are accessible to the public. Enabling free reading, usage, reconfiguration, and modification.

- Open-source projects are a collaborative effort involving volunteers and contributors worldwide. In most cases, governed by licenses that guarantee code quality and transparency.

- Sorint provides premium, enterprise-grade support services for their open-source solutions. Tools like:

  - Proactive Database Software Asset Management
  - Automation for CI/CD
  - Cloud native PostgreSQL manager
  - Firewalling
  - Organization hierarchy representation

sorint.oss

Pillars of Open source

Compelling reasons

Transparency
Easily evaluated. No malicious code. No vendor lock-in & open standards.

Collaboration, education, & innovation
A rich worldwide knowledge and experience sharing. Continuous improvement with space to innovation to match needs or scaling.

Security
Regular code review and faster identification and resolution of security issues.

Customizable and adaptability
In contrast to proprietary software, users enjoy the freedom to modify every aspect. Adapting to various industries and use case.

Lifespan
The open nature of the code allows continuity by any developer/team. No dependency.

Cost-effective
Free of charge.
