- Team's resistance to change.

Quick wins

- The technical knowledge of our scrum masters, project owners, and product managers.
- Incremental and frequent software delivery. Faster development and regular releases.
- Communication and culture change. activities related to "processes and methodologies".

Why Sorint

This solution has a lot in common with Sorint's PMO CeO solution. The main difference is the methodology, and the focus area. In this solution, the focus is delivering software solutions following agile and its framework scrum and kanban. While PMO CeO solution is for all other IT fields.

It is unusual to have scrum masters, PMs with solid technology background in various domains/fields. Sorint offers highly experienced PMO in ICT initiatives. Attempting to fill the gap between project management and technology. Sorint was requested, by recurrent clients, to offer this solution as stand alone. Not only because of this unique fact, but also due to Sorint's successful track of executing projects of different nature. Sorint insists on empowering PMs with the latest trend in their domain(field) enabling PMs to handle projects with unique technical complexity.

On top of this unique attribute. All Sorint's PMs are highly accredited and vary in knowledge, experience, and skills.

Case Study – Delivery improvement

For a well-known Italian company building IT solutions for professionals. Sorint carried out activities of improving product delivery dates by implementing incremental releases.

Some activities included:

- Identification and prioritization of requirements
- Engagement with Stakeholders
- Team empowering activities
- Removal of blockers

Leading to delivering the first product release on time, and setting regular release plan.

Client extend the service for managing project.

Please refer to the official case study for more details on this project.

Case Study – Product development

For an Italian Public Administration. Sorint joined the project from the requirement gathering phase and submitted the product roadmap.

Activities included:

- Analysis of the business needs.
- Identifying the stakeholders.
- Process workflow.
- Building a POC.
- Definition of a product roadmap.
- Submitted diagrams to UI/UX team. E.g., use case scenario.

All deliverables were handed before the deadline. Including the POC.

Main product is under-development. Side-by-side with client's team.

Related Services

PMO – Center of Excellence

Project management as a service (PMaaS) focuses on coordinating IT projects. On both Infrastructure level, and Application software level.

Software Development – Technology Consulting Service

According to Gartner, SD is project management, specifications, design, programming, testing, installation and training associated with a specific application development project of any size.
