

HumanCentered DesignConsulting

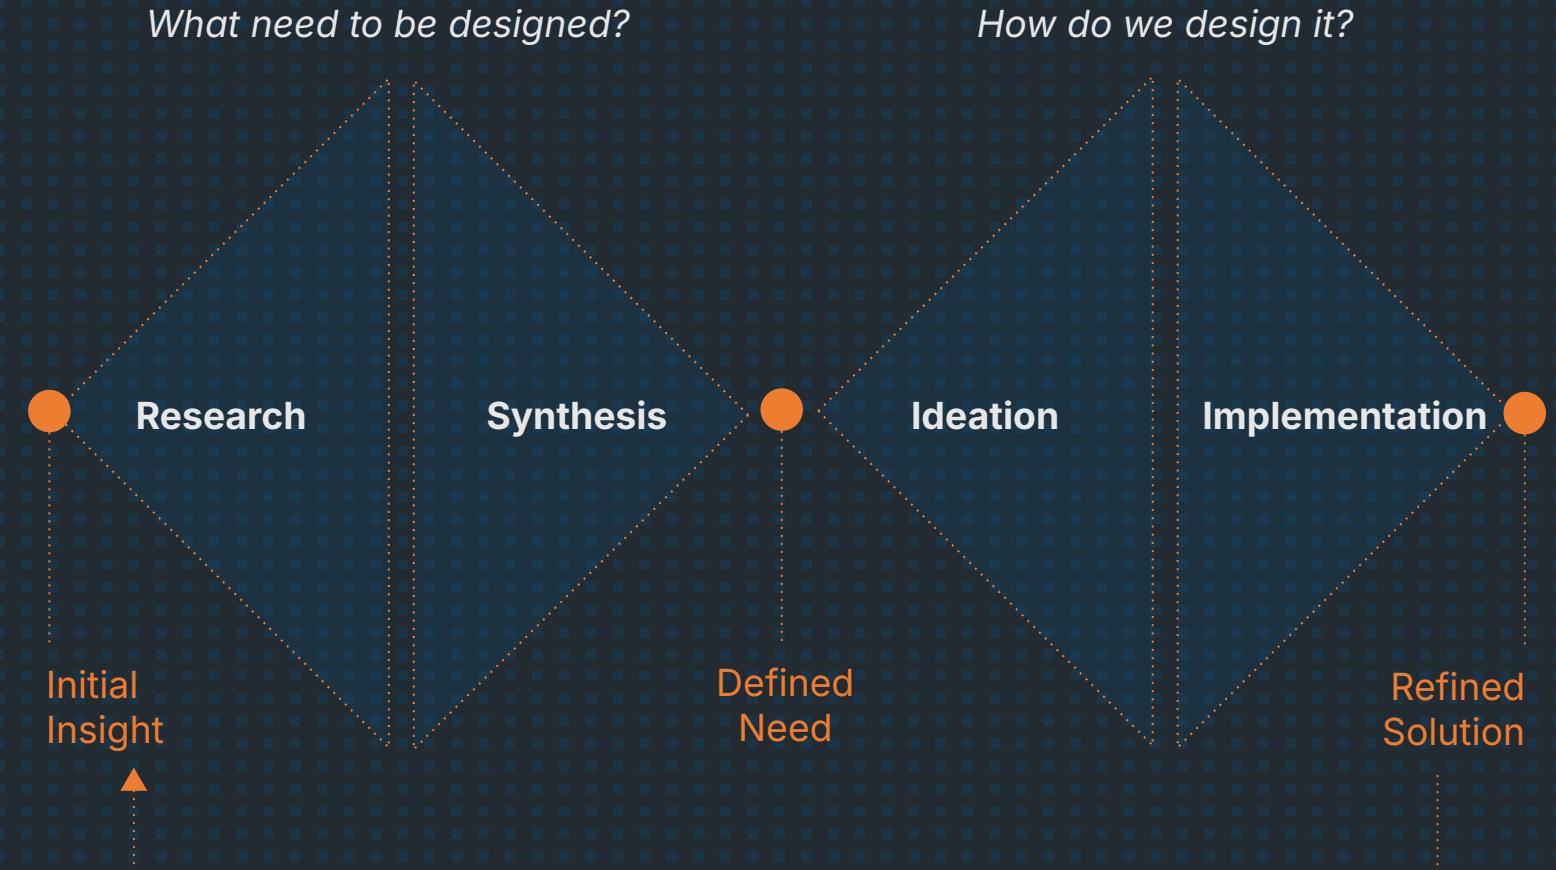

Human Centered Design Consulting

OUR PURPOSE

Connecting people and technology through intuitive, accessible experiences that address real needs

By actively listening to teams, customers, and stakeholders, we create human-centered solutions that drive meaningful digital transformation and truly make a difference.

DOUBLE DIAMOND APPROACH

Human Centered Design Consulting

KEY AREAS OF FOCUS

User Research & Insight Discovery

Identify user needs through interviews, surveys, and analytics. Transform insights into concrete opportunities and design intuitive and user-friendly interfaces, supported by consistent and scalable design systems.

Full-Cycle UX/UI Support

Ensure that UX and UI are effectively integrated into all development processes. We support the project from the ideation and pre-sales phase up to the launch and continuous evolution of the product.

Usability Testing & Accessibility

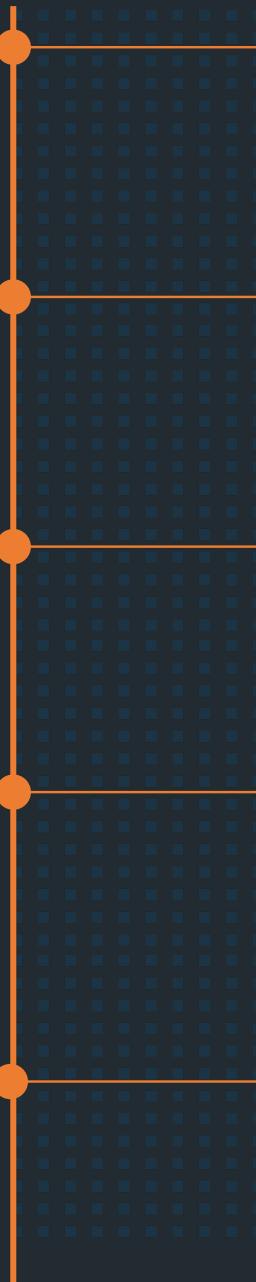

Test your solutions with real users and optimise them based on their feedback. We guarantee accessibility and compliance with standards such as WCAG, to maximise adoption, reduce difficulties, and create inclusive experiences.

UX Strategy & Continuous Innovation

Apply the most modern UX methodologies to create solutions that focus on user needs, emotions, and context, generating better experiences, greater loyalty, and business impact.

Human Centered Design Consulting

OUR COMMITMENT TO A USER CENTRIC APPROACH

01 Discover

Research and Understanding

We analyse the problem, the context, and the real needs of users and stakeholders to optimally collect requirements.

02 Define

Synthesis and Definition

We gather the emerging insights and transform them into a clear and targeted design direction.

03 Define

Ideation and Prototyping

We develop and test concrete solutions, validating them directly with users, stakeholders, and business owners.

04 Deliver

Implementation and Launch

We ensure effective and high-quality implementation of the release, working in close collaboration with technical and business teams through the application of Agile methodologies.

05 Product Optimisation

Continuous Improvement

We continuously and iteratively improve the product through constant analysis of data and feedback from users.

Human Centered Design Consulting

METHODOLOGY LANDSCAPE

User Research

To understand real user needs, behaviours, contexts, and pain points, reducing project risks and supporting data-driven decisions.

Interviews

Surveys

Shadowing

User Analytics

Field Observation

Co-Design & Ideation

To generate diverse ideas, build stakeholder alignment, and accelerate strategic decision-making.

Co-design Workshops

Ideation Sessions

Value Proposition Canvas

Service Blueprint

Prototyping & Concept Visualisation

To rapidly visualise solutions, facilitate communication, and test concepts before development.

Wireframes

Low-fi and Hi-fi Prototypes

Interactive Prototyping

Figma

Testing & Validation

To validate design choices, identify usability issues, and ensure solutions truly work for users.

Usability Testing

User Feedback Sessions

A/B Testing

Heuristic Evaluation

Accessibility & Quality

To create accessible, inclusive products that comply with standards and follow UX best practices.

WCAG-based Accessibility Review

Ass. Technology Testing

Inclusive Design

Behavioural Insight & Optimisation

To identify behavioural patterns, friction points, and opportunities for continuous, data-driven improvement.

Heatmaps

Session Recordings

Funnel Analysis

Behavioural Analytics

Human Centered Design Consulting

PROVEN BENEFITS

A clear and user-focused direction

We transform uncertainty into clarity with a roadmap based on real user needs, aligning teams around a shared understanding of the problem and the people involved.

Faster and validated delivery

We reduce extra work and accelerate time-to-value by validating ideas early. Prototypes and user testing ensure we only build what works.

Greater strategicalignment

We maintain the balance between business objectives, user needs, and technical feasibility, ensuring every design decision generates tangible value.

Collaborative governance

We create a transparent design process with regular checkpoints and insight sharing, simplifying decisions and reducing friction among stakeholders.

Continuous optimisation

We improve the product through constant research, behavioural analysis, and user testing. Data-driven iteration increases satisfaction, loyalty, and long-term impact.

Ready to embrace a truly human-centred approach?

PARTNER WITH OUR HUMAN-CENTERED DESIGN TEAM AND MAKE IT HAPPEN.

Key people

Meet our **designers and researchers**

Luisa Miolano

UX DESIGNER & RESEARCHER | HCD TEAM LEAD

Short bio

Highly experienced Senior UX Designer and Researcher, delivering user-centric solutions for global clients over a decade. Driven by a passion to craft engaging, innovative experiences that transform complex systems and enhance people's quality of life.

KeySkills

DesignThinking UX Strategy User Research Workshop Facilitation
Information Architecture StakeholderMgmt Mentoring Collaboration

BestTool

BestQuote

“Complexity is not, in itself, bad. Confusion is”

DON NORMAN

BestPalette

Alandy Beanes

UX UI DESIGNER & FRONT-END DEVELOPER

Short bio

Technical and visual skilled designer and developer that works between decisional and operational activities, having collaborated in many projects from Telecom, Luxury, Finance and Tourism.

KeySkills

Design Thinking | Information Architecture | Design OPS
Design Systems | Frontend | AI

BestTool

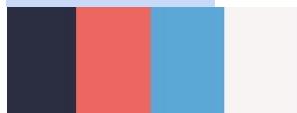

BestQuote

“Creativity is thinking up new things. Innovation is doing new things.”

THEODORE LEVITT

BestPalette

Graziella Dramisino

USER RESEARCHER

Short bio

UX researcher experienced in engaging users of all ages, from children to the elderly, across sectors such as universities, archives, charities, and libraries, to uncover needs and inform inclusive, human-centred designs.

KeySkills

Research Planning Interviewing Usability Testing Workshop

Facilitation Stakeholder Engagement Information Architecture

Empathy Critical Thinking

BestTool

BestQuote

“Don’t make me think.”

STEVE KRUG

BestPalette

Davide Belotti

UX DESIGNER & RESEARCHER

Short bio

A curious, analytical, and precise UX/UI designer who creates accessible experiences guided by logic, data, and empathy.

KeySkills

Design Thinking | User Centred Design | User Interface

User Research | Prototyping | AI

BestTool

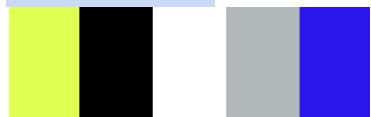

BestQuote

“Complexity is a fact of the world. While simplicity is in the mind.”

DON NORMAN

BestQuote

"Every interface is a quiet dialogue; my job is to make sure the user always feels understood"

Key Case studies

Check out our [work](#)

SyncPoll

Client

SORINT.lab

End users

SORINT.lab Employees

Context

IT Services & Digital Transformation

Challenge

At SORINT.lab, the internal scheduling tool had become technically outdated and no longer met usability standards. To address this, we completely rebuilt it with a new design system and modern UX/UI logic aligned with current industry patterns. The redesigned tool streamlines meeting planning, improves clarity, and significantly reduces time.

Key methodologies

Kanban

Key technologies

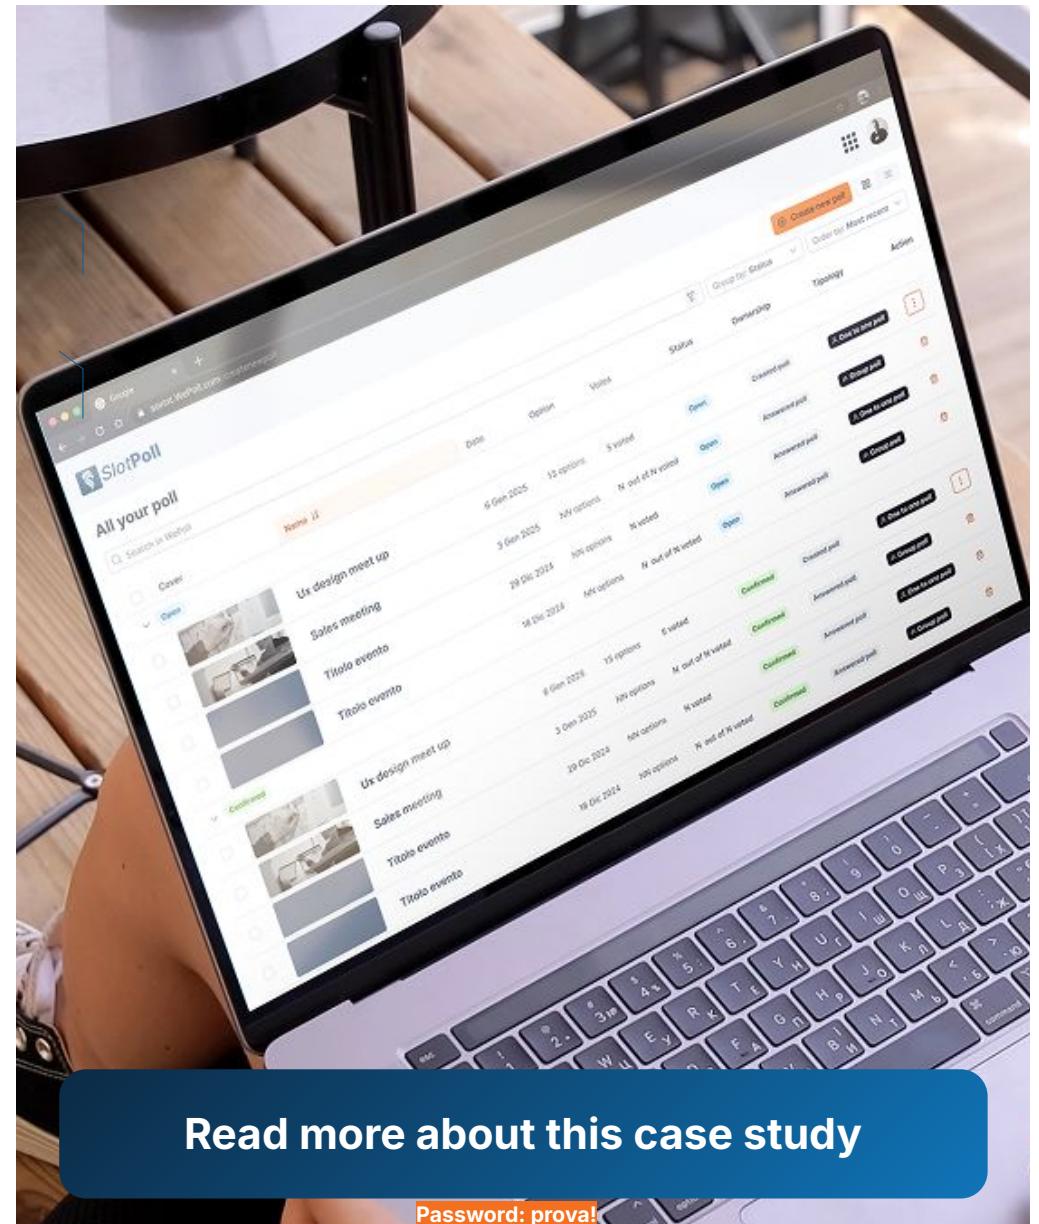

Next.js | React

Project duration

4 months

Solution

The solution developed by our team is called SyncPoll. It allows users to create group polls where participants can vote for their preferred time slots for group calls, or set up booking pages for one-to-one meetings. Everything is managed smartly through seamless integration with calendars.

Hackers Gen

Client

Secondary Schools

End users

Students and teachers

Context

E-learning platforms

Challenge

SORINT.lab saw the need to connect schools with the job market as industry skills evolved faster than academic paths. Students risked missing practical training. The challenge was creating free school-company synergies that added technical skills without disrupting education and while fitting online-learning limits, and ensuring access for all students.

Key methodologies

Agile

Key technologies

Vue | Go

Project duration

2020 | in Progress

Solution

HackersGen isn't just another learning platform: it's a community where teachers, students, and IT professionals exchange ideas and expertise. The UI and UX evolve continuously based on real user feedback, ensuring a smoother, more engaging experience.

P.E.O. P.L.E.

Client

SORINT.lab

End users

HR department employees

Context

HR management

Challenge

SORINT.lab's HR team used outdated tools and scattered systems to manage scheduling, leave, benefits, and performance data. The process was time-consuming and inefficient. The goal was to create a single, integrated platform to centralise all core HR activities.

Key methodologies

Agile | Kanban

Key technologies

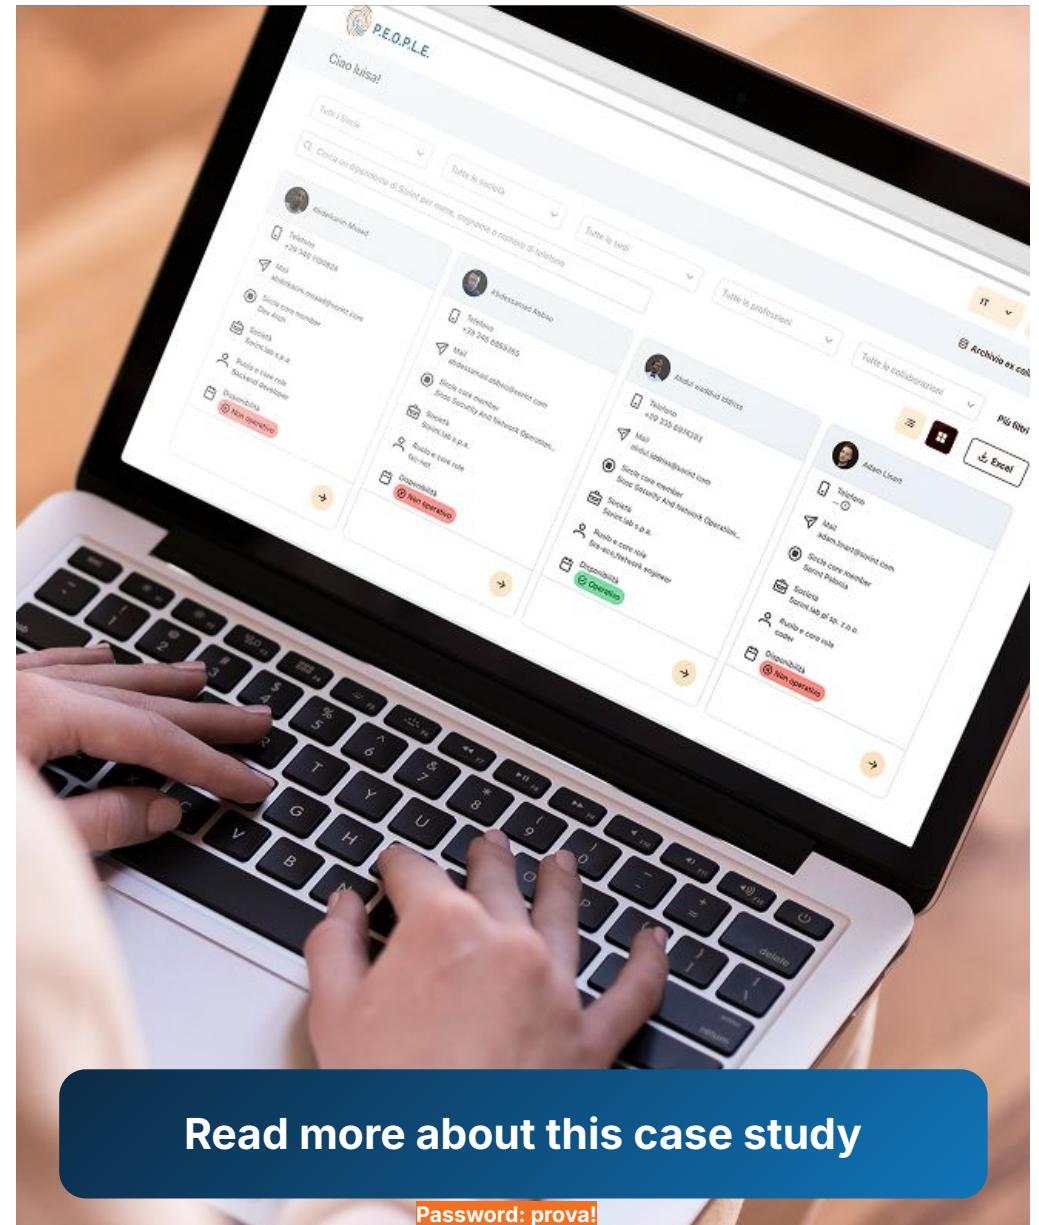

Vue

Project duration

5 months

Solution

We developed P.E.O.P.L.E, a centralised HR platform. Using interviews, personas, and mockups, we collaborated with the agile team to streamline HR operations and provide a real-time view of employees and projects.

Spacebook

Client

Town halls and libraries

End users

All citizens

Context

Venue room booking management

Challenge

Local institutions and citizens often struggle to coordinate public space use: requests get lost, calendars clash, and availability stays unclear. Manual steps slow replies, cause double bookings, and waste spaces. Digitalising the workflow unlocks transparency, efficiency, and a smoother citizen experience for everyone involved in the process each day.

Key methodologies

Scrum

Key technologies

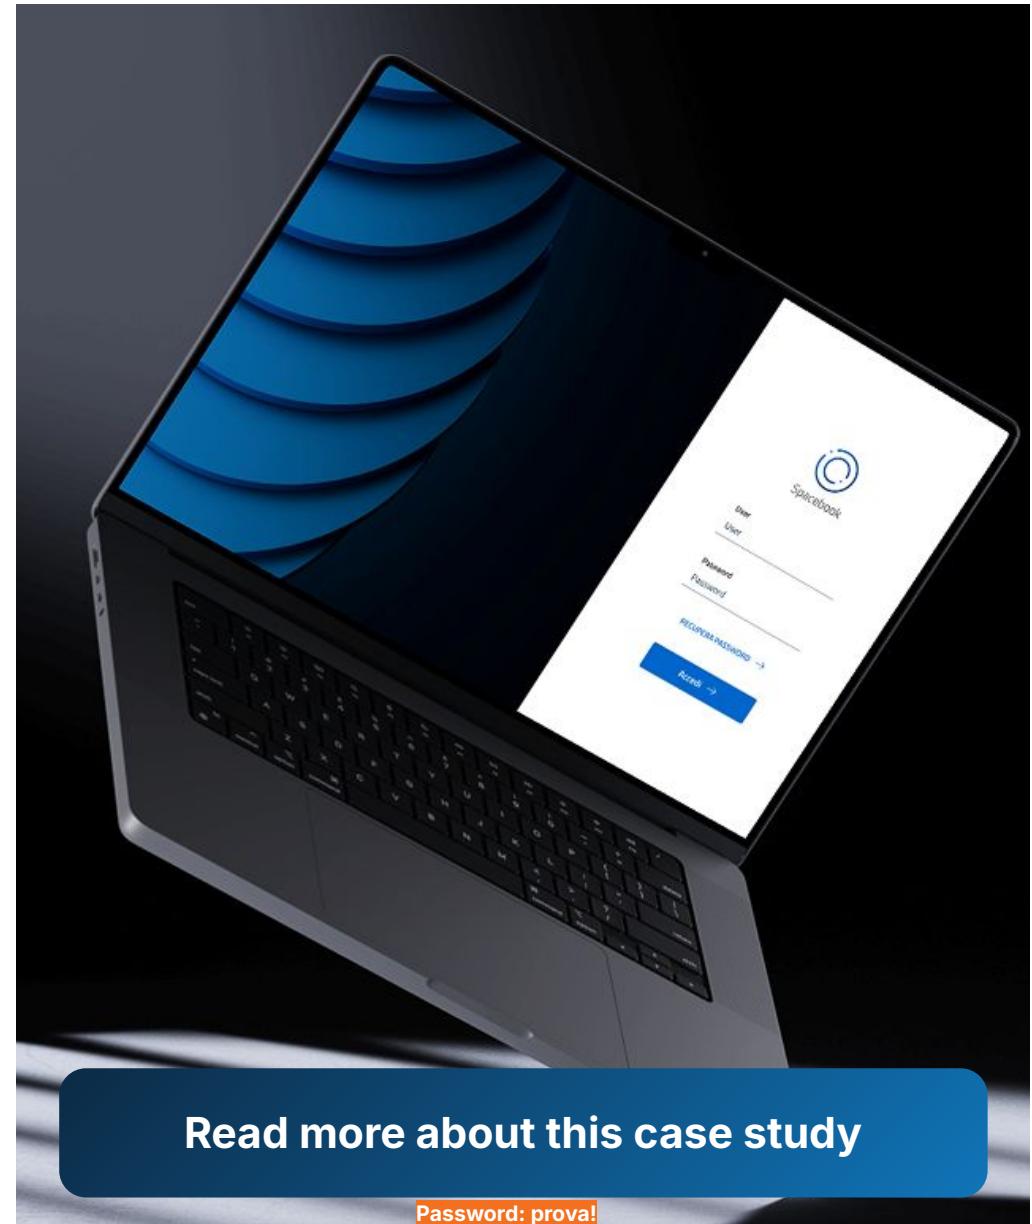

React | Svelte

Project duration

2024 | In progress

Solution

At SORINT.lab we created Spacebook, a platform that makes booking and managing public spaces effortless. With a clear, UX-driven interface, administrators can track availability, resolve conflicts, and update schedules in real time, while citizens can quickly find and reserve venues online, boosting transparency and improving how community spaces are used.

Salazar

Client

SORINT.lab

End users

CIO, CTO, CISO

Context

ERM

Challenge

Bridge the gap between IT teams working in backup and recovery areas and business managers, by enabling a common language to discuss service optimisation, compliance with RPOs and RTOs, and the development of more resilient systems.

Key methodologies

Agile | Kanban

Key technologies

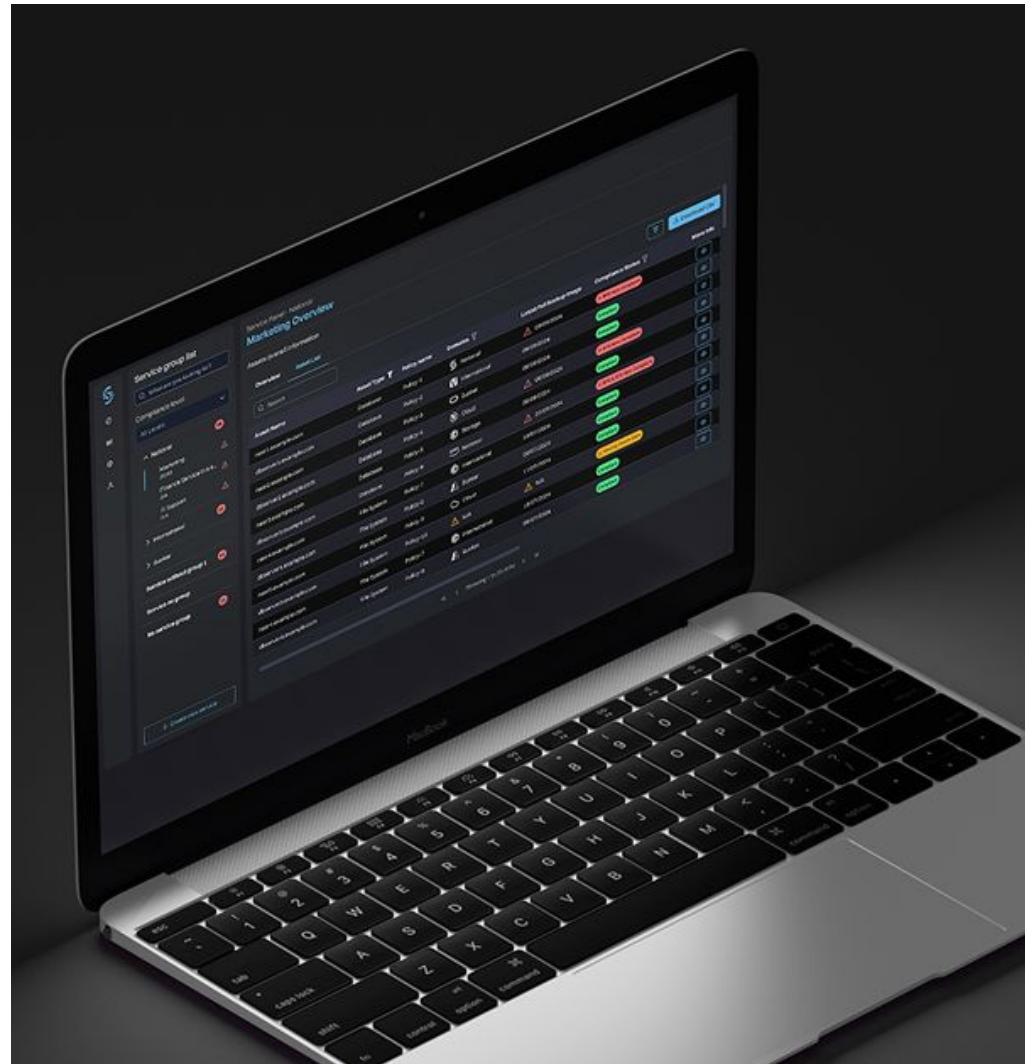

Go | Vue

Project duration

2023 | in progress

Solution

This is where Salazar comes in. Informed by research with key users, our all-in-one platform helps organisations define, monitor, and optimise RPOs, strengthening resilience and enabling smarter, value-driven decisions.
