- The Journey – 9D Factory Manifesto
- Why SORINT.lab?
- Service’s Delivery Models

SORINT.lab

Software Development

Initial consultation, discovery, to full-scale modernization, we approach the full spectrum of software development with a focus on:

- Cost & time
- Efficiency & innovation
- Security
- Delivering business value

Designating thorough research and AI to ensure every product we engineer or manage becomes a strategic asset ready to produce real business results for organizations:

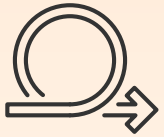
Dynamically agile govern

Maintenance & monitoring

Researching

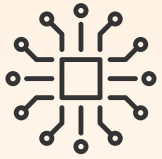
Application performance

Architecting



DevOps & DevSecOps

Human-centered design



Integrating AI into SDLC

Modernizing legacy solutions

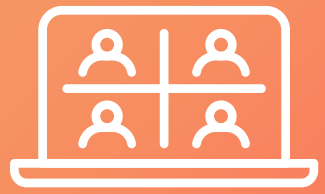
Technology & framework selection

Our Approach to Value Creation & Realization

Software Factory's One Team Manifesto

Commitment
Only 15% of software requires custom development. We are committed to transparent advice, researching marketing solutions, innovative workarounds before proceeding to custom engineering.

Lower cost, time, & risks
Well disciplined AI usage, agile practices, and by building upon our massive bucket of reusable code, modules, libraries, design systems.



Horses for courses
Our Scrum teams—comprising SW Architects, Developers (FE/BE), Security Practitioners, UI/UX Designers, Researchers, QA, DevOps, and APM experts—are specifically coordinated and mobilized to ensure best practices and optimal results!

Contracting
Dynamic and flexible, yet regulated to uphold strict SLA and QA attributes.

Quarterly rituals, habits, rhythms, philosophies, and behaviors

Agile runs the show at SORINT

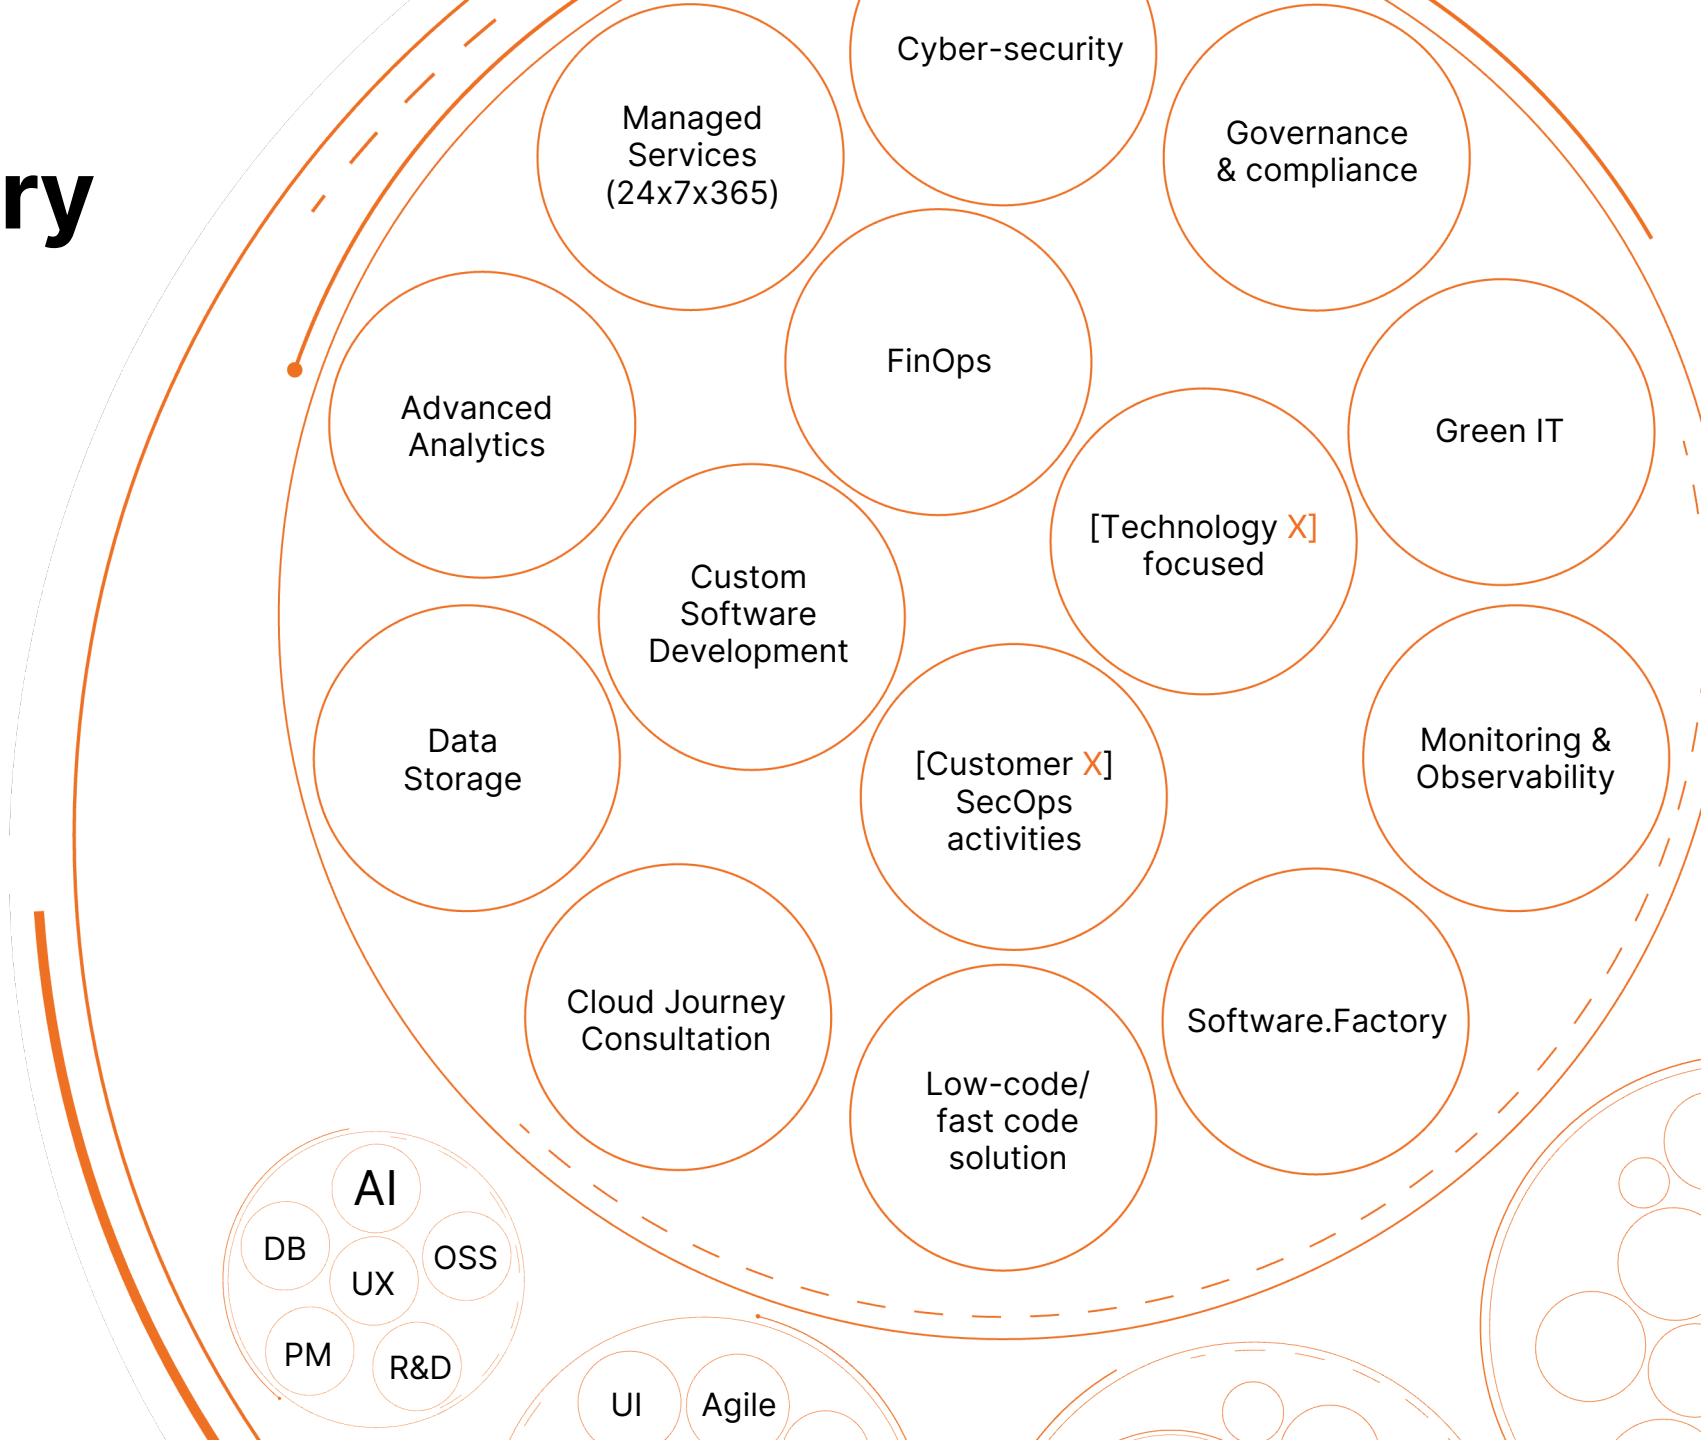
A Multidisciplinary Enrichment

sircles

A framework which allows effective collaboration across specializations, maximizing value by involving experts from every field. Smoothly!



SORINT.lab

BUILDING GREAT TECHNOLOGY

Factory's 9D Manifesto for Custom Software Development

Dream 1
Engage with the client, explore the idea, and define next steps

Discover 2
In-depth research and insight gathering

Describe 3
Identify the best solution based on effort, cost, and time estimates

Deliberate 4
Detailed solution and architecture design

Design 5
Strategic planning and informed project decisions

Develop 6
Implement the planned activities from previous phases

Deliver 7
Continuous, monitored, and reliable delivery (DevOps)

Debrief 8
Learn from experience, capture lessons learned, and identify best practices

Derive 9
Iterative and Agile product development

Testimonials

SORINTians Appreciated the Most in 2025!

ELITE
A EURONEXT COMPANY

One of the key factors behind the success of the project and our strong relationship with SORINT.lab is the trust we've built. The governance factor of contracting ensured the project is delivered within the set budget, while maintaining flexibility to adapt our evolving needs on the go.

Giordano Sassaroli
Head of Product Development & Management at ELITE (Borsa Italiana)

illy

Gold medal. SORINT could not do better, perfect! SORINTians were working with illy, not for illy, I had this impression. Always!

Fabio Bogoni
Head of Technology, Operations & Security at illycaffè's

sorgenia
YOUR NEXT ENERGY

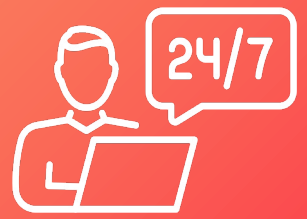
Synergy, timely management of reports, support, and consistent response time to operational needs stood out for us! ...From the initial phases, the technical team demonstrated expertise, availability, and proactivity. This did not only, facilitate the adaptation of Sorgenia's specific needs but it also fostered a relationship of trust and a shared vision of technological and strategic objectives.

Federico Piavani
Head of IoT at SORGENIA

Tackling Challenges with SORINT.lab

Managing & Operation

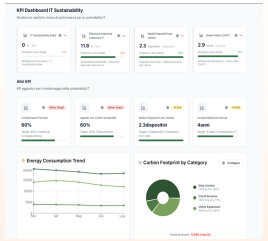
We fully manage various applications and infrastructures of prominent organizations in Europe, US, and Africa



End-to-end Technology Support

Holistic IT & governance capabilities, rather than a point solution

Assessment portals & templates
to better demonstrate the unique needs & project governance attribute!



100% Vendor Independent – Purpose

Believe in technology that fosters innovation and human wellness. Our commitment towards every company, institution or community is to help them run their business and solve their problems through a choice of the best technology.

98% Customer Retention Rate

Offering's Delivery Models

Consultation
Assessment & discovery activities. Often concluded with business, solution selection & technical remarks.

Staff augmentation
Integrating skilled practitioners within client's team.

Project scoped
Defined deliverables, that might include implementation for achieving the specified objectives.

End-to-end
Dedicated multidisciplinary teams delivering and managing the entire product lifecycle up to full operational management.
