Modern Infrastructure & Data Center

Architect and optimize modern IT environments to deliver the precise scalability, security, and efficiency your daily business demands.

Turning legacy tech stack into a resilient, future-ready foundation built for growth.

Design hybrid/multi-cloud data center

Backup & Storage

Managing & operating

Virtualization

Observability

Automation initiatives

FinOps

Network

Security

Enabling a modern IT infrastructure

Adopting cloud technologies

Modern implementation of containerization & virtualization

Adopting automation frameworks

Adopting GitOps frameworks

Introducing modern observability frameworks

Easily upgrading of software & application

Effective data & recovery management

Scalability

Long-run cost & operational optimization

Security & compliance

Common Portfolio of Activities

Entails aligning with the latest industry standards, best practices, and business needs.

Server orchestration

One-click infrastructure automation. A unified framework to seamlessly provision, manage, and consolidate VMs and servers across any environment.

Patching services

Planning and managing security patches across diverse platforms. Including Red Hat Satellite, Foreman, WSUS, SCCM, and custom deployment frameworks.

Server migration

Transitioning from unsupported OS to modern ones. Through custom automation pipelines and effective migration processes.

Compliance

End-to-end defect management and real-time environment observation. Disciplined regulatory compliance mapping.

Data center automation

Advanced, platform-agnostic automation frameworks. Orchestrating entire physical and virtual footprint. Core hardware, storage, and networking to OS layers along with application layer.

Containerization

Monolithic to agile, microservices-based architectures. A full-stack containerization strategy. Baking security and speed directly into your lifecycle via automated CI/CD and DevSecOps pipelines.

Backup & storage

End-to-end solution design, implementation, support, and task automation. Enforcing strict security hardening across your entire data management infrastructure to guarantee total resilience.

Project Management

Strategic governance and execution. Ensuring milestones are met keeping projects strictly aligned with predefined requirements, timelines, and within budget.

The Make IT Model

Tailoring the journey

Discovery & assessment

Comprehensive analysis of your organization, business drivers, and tech context. Map operational ecosystem to align stakeholder objectives and ensure precise project execution

Strategy & roadmap

Inline with requirements & following best practices. A phase focused on tailoring and delivering a tailored solution From prerequisites, activities, tools, to timelines, cost and knowledge transfer.

Implement

Govern according to verified roadmap and defined SLAs and XLA.

Post & pre-project documentation.

Verification

A stage attributed to, optimization, testing & verification activities.

Managing & optimizing

Optionally and dynamically modeled according to mutual agreement.

Might include partially or full management of client's infrastructure. Up to 24x7 "follow-the-sun" model.

Multi-disciplinary approach

Shoulder-to-shoulder with client's team

Quality assurance team & SLA compliance

Day y

A Multidisciplinary Enrichment

A framework which
allows effective
collaboration across
specializations,
maximizing value by
involving experts from
every field. Smoothly!

“ Testimonials SORINTians Appreciated the Most in 2025!

One of the key factors behind the success of the project and our strong relationship with SORINT.lab is the trust we've built. The governance factor of contracting ensured the project is delivered within the set budget, while maintaining flexibility to adapt our evolving needs on the go.

Giordano Sassaroli
Head of Product Development & Management at
ELITE (Borsa Italiana)

Gold medal. SORINT could not do better, perfect! SORINTians were working with illy, not for illy, I had this impression. Always!

Fabio Bogoni
Head of Technology, Operations & Security at
illycaffè's

Synergy, timely management of reports, support, and consistent response time to operational needs stood out for us! ...From the initial phases, the technical team demonstrated expertise, availability, and proactivity. This did not only, facilitate the adaptation of Sorgenia's specific needs but it also fostered a relationship of trust and a shared vision of technological and strategic objectives.

Federico Piavani
Head of IoT at SORGENIA

Tackling Challenges with SORINT.lab

Infrastructure & Operation

We fully manage critical applications and infrastructures of prominent organizations in Europe, US, and Africa!

End-to-end Technology Support

Holistic IT & governance capabilities, rather than a one-point solution

Assessment portals & templates to better demonstrate the unique needs & project governance attribute!

100% Vendor Independent – Purpose

Believe in technology that fosters innovation and human wellness. Our commitment towards every company, institution or community is to help them run their business and solve their problems through a choice of the best technology.

98% Customer Retention Rate

Offering's Delivery Models

Consultation

Assessment & discovery activities. Often concluded with business, solution selection & technical remarks.

Staff augmentation

Integrating skilled practitioners within client's team.

Project scoped

Defined deliverables and milestones, encompassing full-scale implementation to achieve specific objective(s).

End-to-end

Dedicated multidisciplinary teams delivering and managing the entire addressed objective.
